

Close Encounters of an Aquatic Kind

Dubai Aquarium & Underwater Zoo announces new interactive experiences!

Dubai Aquarium & Underwater Zoo, the must-visit destination in The Dubai Mall that showcases the marvels of the aquatic world, has always something new to offer to their guests. Now at Dubai Aquarium & Underwater Zoo, guests will have the extraordinary opportunity to go behind the scenes and enjoy exclusive access with new **Animal Encounter Experiences**.

Launching on January 7 2016 these will provide guests with an opportunity to get up close and personal with three incredible species - otters, rays and salt water crocodiles! Each **Encounter** will offer information on how the animals are cared for at Dubai Aquarium & Underwater Zoo and highlight several species conservation initiatives.

Otter Encounter

We'll take you behind the scenes of the otter habitat to interact with these charismatic animals. Meet a member of this small-clawed otter family during a special educational presentation to learn more about training and otter behaviour.

Ray Encounter

Go backstage of the Dubai Aquarium to meet, touch and feed up to 50 rays in this exhilarating animal interaction. Spend time with this graceful species and you will quickly understand what makes these marine creatures some of Dubai Aquarium & Underwater Zoo's most popular residents.

Crocodile Encounter

Weighing in at a whopping 750 kg and measuring over 5m in length, King Croc surely will not disappoint. In addition to this close encounter with not one, but two Saltwater crocodiles, participants will learn about crocodile behaviour and the history of King and Queen Croc.

Animal Encounters are held every hour, daily from 11am to 10pm. Each **Animal Encounter** is priced AED 200 per person.

Book online in advance as limited space available!
